Experience

Legato Health Technologies

2020 Oct – present

Associate Software Engineer

Client : Anthem

Project : Smarthelp

Project description:

A dynamic tool developed by Platform Services, uses data and APIs across all applications, giving us a consolidated view of Enterprise Engagement enabling a better support model for all our Sydney Platforms.

Key Deliverables:

- Worked closely with the business owner to gather and understand the business and functional requirements.
- Designed and implemented the rest APIs for the UI screen using Nest Js.
- Worked with US team members to solve priority issues and development bug issues.
- Involved in sprint planning, daily stand-up, sprint review and retrospective meetings.
- Implemented new features and functionalities on the website using React js.
- Worked on troubleshooting the issues and fixing the bugs.
- Participated in team building activities.
